WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

The weather pattern will remain unsettled the next several days due to a Pacific trough influence. Timing of the heavier precipitation influence is the main uncertainty due to weather model fluctuations.

Precipitation will spread from west to east across the area continuing through Thursday and Friday. Storm total liquid water amounts will range between 0.5 to 1.0 inches in the mountains with much lighter amounts within the Sacramento Valley. This system will be a warmer one so snow levels will remain above 5000 feet. S to SW winds will also increase Thursday. Predicted speeds have come down slightly with this system passage but the higher exposed ridges will experience readings between 30 to 40 mph, favoring the north. Wind speeds will lower on Friday. Humidity will increase with the increasing wind speeds.

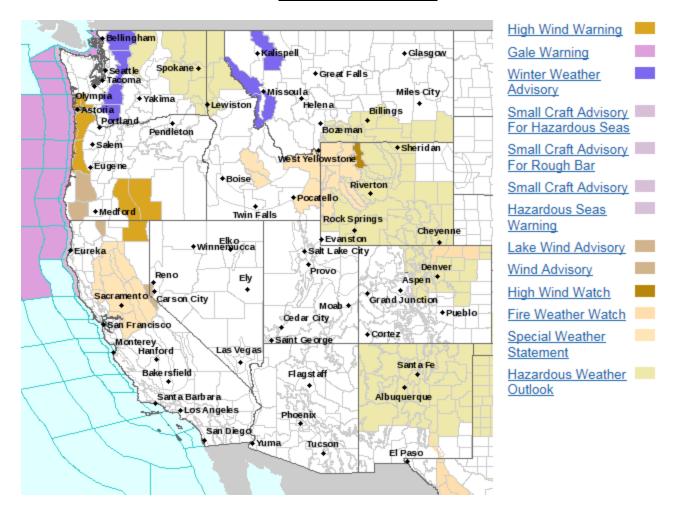

A few spot showers may impact the Northern California region during the weekend and Monday but amounts would be very light and inconsequential. Temperatures would generally be above normal. The main Pacific trough passage has been delayed and is now projected for the Tuesday through Thursday time frame. Widespread wetting precipitation is still anticipated with lower snow levels due to the cooler air.

SOUTHERN CALIFORNIA

A weak ridge of high pressure over California will maintain warm and dry conditions across the region through Thursday. Maximum temperatures will be 5 to 10 degrees above normal, with mid 50s to mid 60s across the mountains and upper 60s and 70s in the valleys. Minimum humidity will be mainly in the single digits and teens today and then humidity will increase from north to south throughout the day Thursday. Winds will be light through Thursday. Temperatures will cool to near normal and humidity will become high Friday through this weekend as the ridge breaks down and zonal flow takes place. A disturbance in the flow will bring showers to Central California starting Friday morning and to Southern California starting Saturday afternoon. Showers will end across the region Sunday afternoon. Most locations will receive between a quarter inch and a half inch of rainfall, but some mountain locations will receive up to an inch of rainfall. The snow level will be between 8,000 and 9,000 feet. Westerly winds of 20 to 30 mph with gusts to 50 mph will surface across the wind prone mountain and desert areas Friday. A weak ridge of high pressure will build into California from the Pacific Ocean which will cause temperatures to become 5 to 10 degrees above normal and humidity to become low once again early next week. Local northeast winds of 10 to 20 mph with gusts to 35 mph will surface across the mountains and below the canyons and passes of Southern California Sunday night through Monday morning.

WEATHER MAP

Cal OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

• 2018-LAW-45527, 03/05/18, 1400 hours, Sacramento County Sheriff's Department (SCSD) is requesting resources to assist in locating the remains of a drowning victim. SCSD is requesting (2) water certified Human Remains Detection (HRD) Search Dog Teams. El Dorado County Sheriff's Department is responding with requested resources. Update: 03/05/18, 1900 hours, SCSD is requesting (2) additional search dog teams to assist with the search that took place on 03/06/18 at 0800 hrs. The Governor's Office of Emergency Services, Law Enforcement Branch is coordinating the search dog team response. Mission Ongoing

Cal OES MISSION TASKING

Cal OES Missions

- **2018-Inland-45563:** Air Quality Support Happy Valley Incident, Shasta County. (Coordinating)
- 2018-IREOC-45244: Caltrans to remove dead and dying trees along highways in Kern, Tulare, Fresno, Madera, Mariposa, Tuolumne, Calaveras, Butte, Plumas, Sierra, Shasta, and Lassen counties.
- 2018-Southern-44905: Communications support, Baker to Vegas Annual Challenge Cup, San Bernardino County (Coordinating)
- 2017-SOC-44098: CalRecycle Debris Management Team in Ventura County
- 2017-SOC-43821: DTSC to remove household hazardous waste from over 500 residential lots in Ventura County (On Scene)
- 2017-Inland-42559: Weather station installed to gather real time rainfall data by Air Resources Control Board (On Scene)

Mission:

We protect lives and property, build capabilities, and support our communities for a resilient California.

We achieve our mission by serving the public through effective collaboration in preparing for, protecting against, responding to, recovering from, and mitigating the impacts of all hazards and threats.
